

# Are Virtual Visits Here to Stay?

We need the input of primary care providers and the individuals in your care!

Researchers from the University of Manitoba are conducting a study to understand:

- 1) how virtual care has been implemented in practice
- 2) patients' and caregivers' experiences and perspectives
- 3) how virtual health service delivery can be sustained and improved

Choose one or more ways to participate\*:

- A small focus group
- Piloting a patient feedback system
- A capstone event to develop recommendations

\*Honorariums/incentives for participation

For questions or info about the study, please email or call:  
Dr. Alanna Baldwin, Project Manager
